IIC SightGuard

Eliminate stock outage and increase productivity with the IIC SightGuard inventory control system. The IIC SightGuard removes human error from stock control and creates a usage-based environment that can reduce waste by 15 to 30%, demonstrating significant savings almost immediately.

The powerful reporting software provides clear accounting of supply usage and enables forecasting and reduction of inventory levels by 50% or more. The automated reporting system is capable of automatic user defined alerts with escalation ability.

The IIC SightGuard system can be used on the factory floor to account for supplies, tools, personal protective equipment and more.

Intelligent Inventory Control Features:

- **Robust Security Features**
- **Adjustable Capacity Configurations**
- **Vigilant Vend Sensor**
- **Cloud-based Software Technology**
- **Check-in, Check-out Functionality**
- **Inventory Critical Stock Alerts**
- **IoT Inventory Gateway Integrations**
- **Enhanced Product Visibility**
- **Cost Efficient Storage Control**
- **Brand Management**
